

PRECISION MEDICINE SURVEY

As of 2015, academic hospitals find precision medicine to be more relevant than their nonacademic counterparts. However by 2020, survey results show that may change.

How significant of a role do you believe precision medicine will play in your organization in the next 5 years?

Does your organization have plans to integrate genomics into its Electronic Health Record?

36%

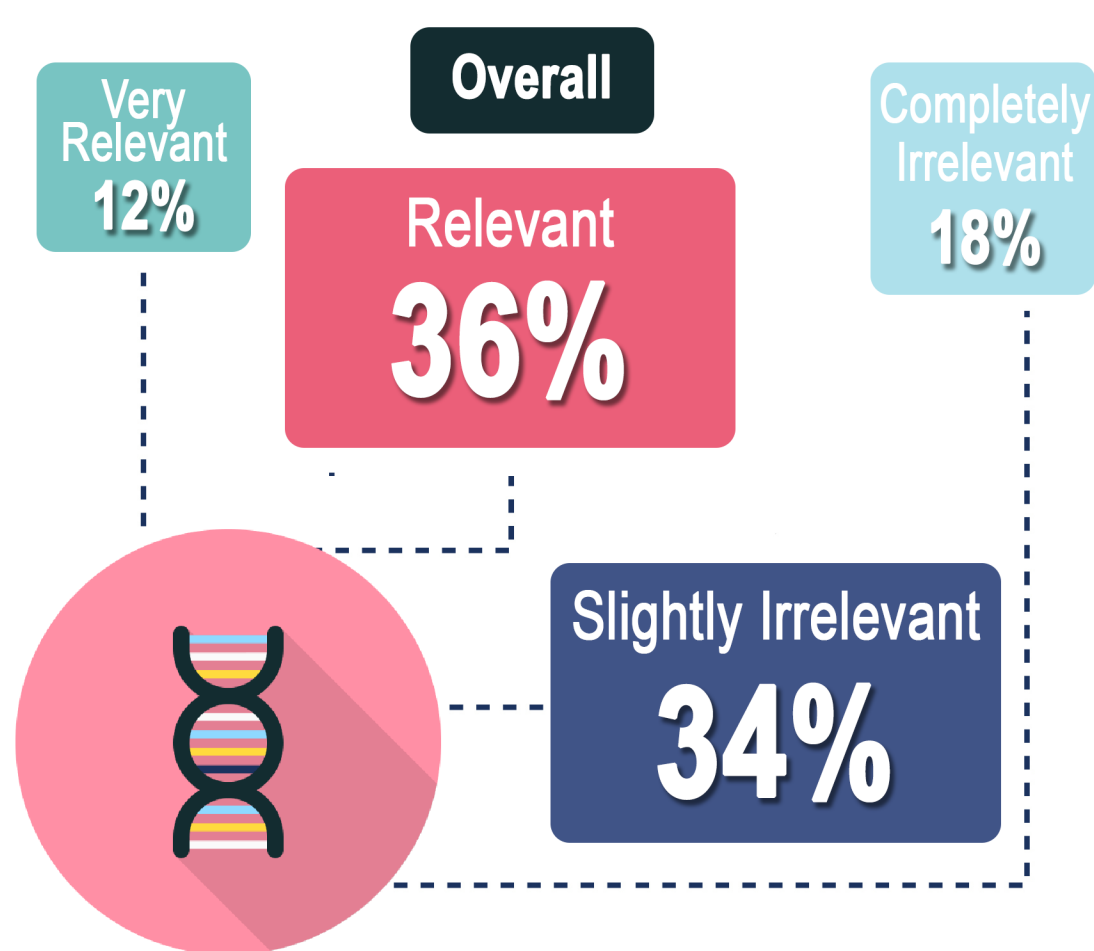

YES

64%

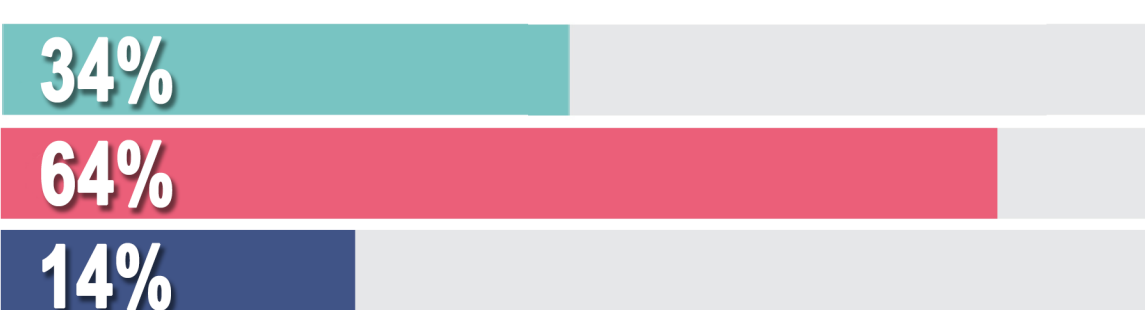

NO

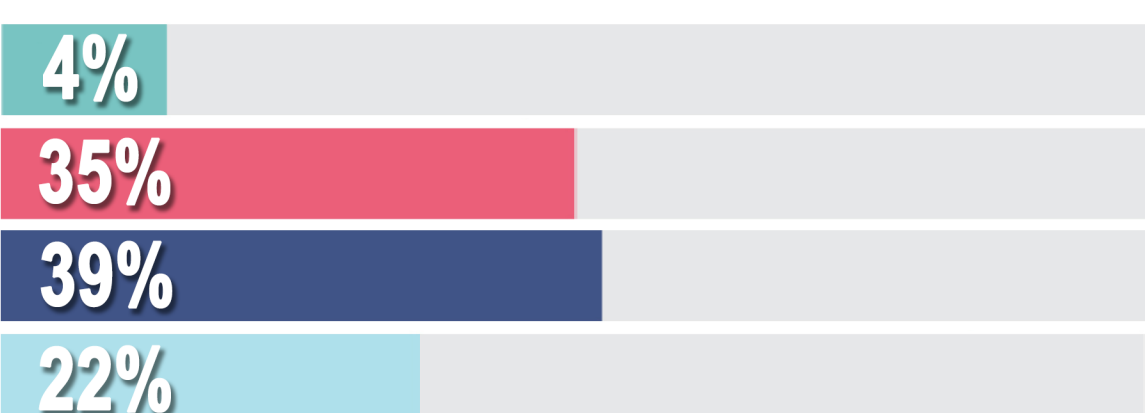

How relevant is DNA sequencing to your organization's patient treatment strategy?
