Survey Reveals only 1/3 are ready for MACRA

Understanding
Two Tracks and a Final Rule

CMS issued the final rule on MACRA, making it easier to comply with minimal, partial reporting in the first year.

+/- 9% by 2022

MACRA

Of small & medium sized hospitals expect to receive a bonus or break even

Preparation for MACRA

26%
Have a MACRA strategy for their employed providers but haven’t made much progress implementing it

33%
Would participate in MACRA but currently have no strategy

33%

The Bottom Line
Health Systems Are Marching Ahead with MACRA

Findings above are according to a new Health Catalyst®/Peer60 survey of 187 healthcare professionals who responded to an online survey in late 2016. Respondents included 37 CEOs and 94 other C-Suite executives including CFOs, CIOs, CMOs, and CMIOs. They work for organizations ranging from some of the nation’s largest urban academic medical centers and integrated delivery networks to small, rural critical access facilities.
